Notes on American English

American English came of age and declared its independence early in the 20th century. Since then its influence has become world-wide and it has affected the parent tongue. In 1952 we spoke of 'the virtual drying up of the Atlantic as a speech barrier'; the traffic has been from west to east, not from east to west. In this newest version of the dictionary the label '(*U.S.*)', formerly used to distinguish purely American English, has been dropped almost entirely.

Certain differences of spelling remain and spelling differences in a number of individual words (e.g. *maneuver*, *defense*, and *practice* as a verb) have been noted in the dictionary. Groups of words in which the spelling is different are as follows:

Eng.	U.S.	
ae	*e*	The tendency to replace *ae* and *oe* in words from Greek or Latin by *e* is more strongly developed in the United States than in Britain: e.g. *etiology*, *hemoglobin*, *esophagus*.
ize or *ise*	*ize*	In verbs and their derivatives that may be spelt *-ize* or *-ise*, Americans prefer *-ize*.
ll	*l*	Ame
		-er, *victualed*, *-ing*, *-er*, etc. Also *woolen*.
l or *ll*	*ll*	*enroll*, *enthrall*, *instill*, *thralldom*.
l	*ll*	In *fulfill*, *skillful*, *willful*. In nouns in *-ment*: *enrollment*, *enthrallment*, *fulfillment*, *installment*.
our	*or*	American spellings such as *color*, *humor*, have often been noted in

Measures of Length

The **metre** (Fr. *mètre*), the unit of length, originally intended to be the ten-millionth part of a line drawn from the Pole to the Equator, was later more exactly defined as the distance, at the melting point of ice, between two points on a platinum-iridium bar at the International Bureau of Weights and Measures near Paris. It is scientifically defined in wavelengths of orange radiation of an isotope of krypton.

1 Metre = as above.
